

Transition to Owner-Managed Company

epsotech Reaches Next Milestone in its Restructuring Process

Jülich, April 1st, 2025 epsotech has achieved the next milestone in its ongoing restructuring. At a meeting, the creditors approved the acquisition of shares in the foreign subsidiaries of the epsotech Group by SKENDER GmbH. This decision reflects the creditors' confidence in the potential of the restructuring under the leadership of Predrag Skender and marks the transition to an owner-managed structure for epsotech – linked with the perspective of sustainable growth through collaboration with our employees and our customers.

„With a strong focus on quality, reliability, and stability, I am excited to embark on this new chapter in epsotech's history alongside our employees and our customers, says Predrag Skender, CEO of the epsotech Group. “At the heart of our business strategy has always been, and will remain, our commitment to being the trusted partner for plastic sheets and films.”

epsotech is confidently navigating the challenges currently impacting the plastics industry, thanks to its ongoing restructuring efforts. "The continued trust and regular orders from our customers validate that our 'Competence Center Strategy' is the right path, and this reinforces our commitment as management to stay the course," says Skender. The restructuring process is expected to be completed in the first half of 2025, with this goal already clearly within reach.

"We are in the final stages of our reorganization and would like to take this opportunity to express our gratitude to all our employees and customers for their loyalty and support over the past months," says Skender. “We will continue to strengthen our partnerships and assure you that we will do everything in our power to ensure that epsotech not only meets, but exceeds, our customers' expectations in the future – globally, and of course, also in Jülich.”

About epsotech:

For more than 60 years, epsotech has been developing customized plastic solutions for a wide range of segments and markets. Each year, the group supplies more than 2,500 customers worldwide, combining the strengths of 6 European production sites. epsotech offers the most comprehensive portfolio of extruded sheets and films in Europe - with the goal of 100% recyclability and return to the material cycle.
