

MADE FOR EVERY TOMORROW
Vision. Mission. Values.

As a family-owned company, we think long-term, act responsibly, and put people first.

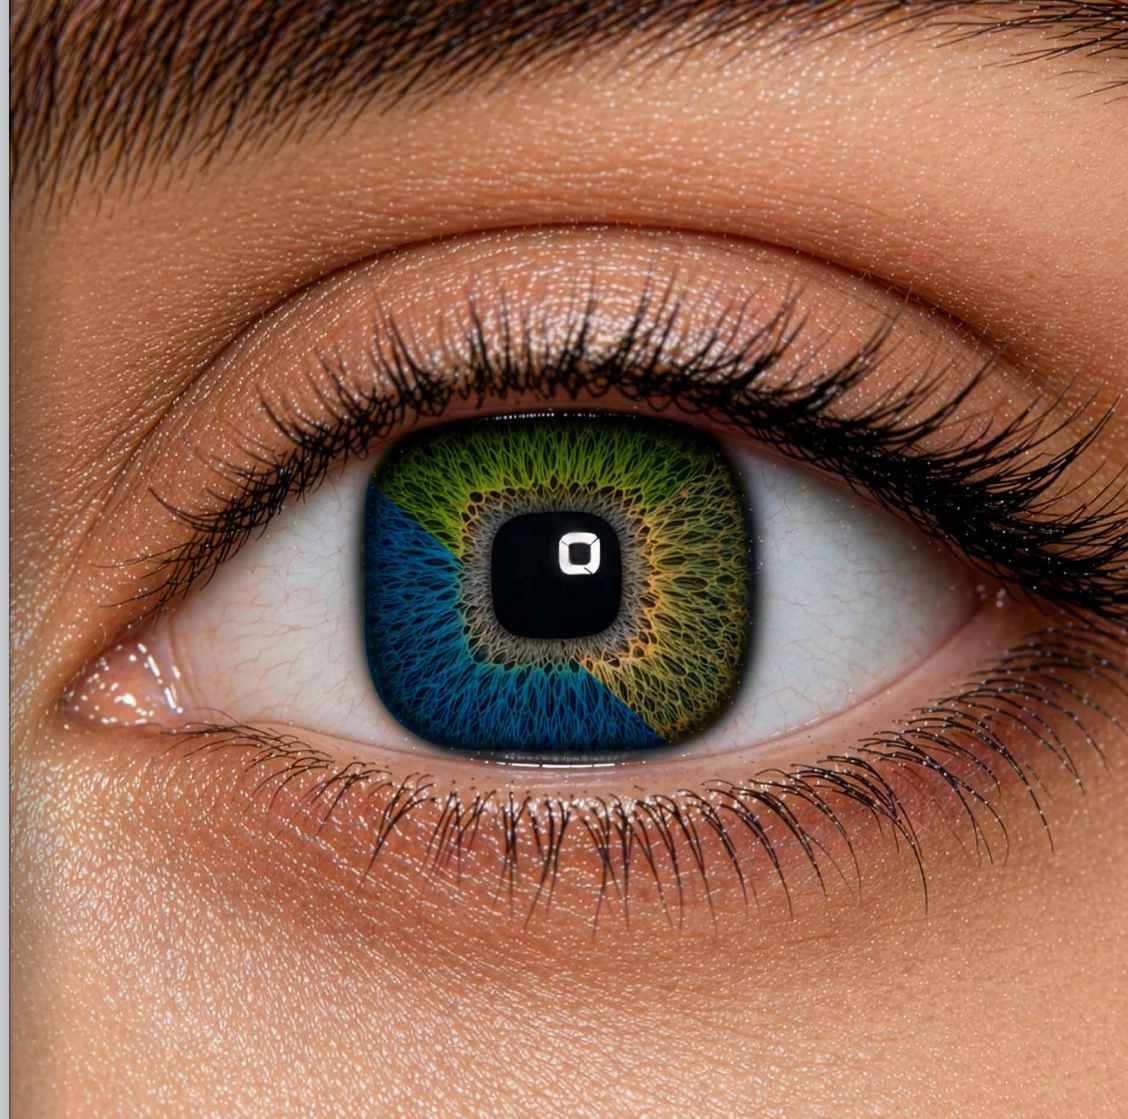

This is how we become everyone's first choice for polymer solutions.

Predrag Skender
Owner & CEO
epsotech part of SKENDER Group

OUR VISION

A vision defines a destination before the path is fully visible. Ours is ambitious by design — not a market position we claim, but a reputation we earn. Customer by customer. Every day.

Everyone's first choice for polymer solutions.

OUR MISSION

Where the vision sets the goal, the mission defines the daily work. Ownership matters here: independence lets us think beyond the next quarter and invest in what lasts.

A family-owned company. Delivering tailored solutions today. Innovating for tomorrow.

OUR VALUES

Values show themselves in decisions, not in statements. These four guide how we collaborate, how we serve our customers, and how we take responsibility — every day, at every site.

We put people first.

We focus on our customers.

We drive innovation.

We take responsibility.

OUR VALUES

WE PUT PEOPLE FIRST.

We care for each other as a team, building internal and external partnerships to create a safe and respectful workplace every day.

OUR VALUES

WE FOCUS ON OUR CUSTOMERS.

We know our customers by name, listen to their needs, and deliver high-performance solutions that truly help them succeed.

OUR VALUES

WE DRIVE INNOVATION.

We continuously improve through
innovation and excellence.

OUR VALUES

WE TAKE RESPONSIBILITY.

We protect the environment and act responsibly in all decisions we make. Our strong governance ensures integrity and reliability.

OUR PRODUCTS

From everyday products to highly engineered applications. At epsotech, we manufacture thermo-plastic sheets and rolls that are transformed into products people use every day. Our materials can be found in caravans, trucks, trains, medical equipment, displays, sanitary products and many other applications. With one of the broadest portfolios in the market, we offer solutions based on **ABS, PS, PO and PVC**, ranging from standard and decorative materials to engineered and sustainable products with recycled content.

Combining performance, quality, innovation and sustainability, we help our customers bring ideas to life.

Just a few applications per brand: **epsoessential** **epsoengineered** **epsoearth**

THE FIRST CHOICE FOR
POLYMER SOLUTIONS.
