

## epsotech appoints new Management Board

Press Release, Jülich, July 2020

In June 2020, epsotech has appointed two new managing directors to epsotech Holding GmbH. **Dr. Matthias Stein** in the function as **CEO** and **Mr. Michael Hangelmann** in the function as **CFO** will lead the epsotech group into the future. They replace **Mr. Matthias von Buzay** in his long-standing function as CFO and CEO.

**Mr. Matthias von Buzay** has significantly promoted the realignment and repositioning of the group. Also the rebranding from VitasheetGroup to epsotech in October 2018, was successfully implemented under his leadership.

Since the rebranding, epsotech has consistently worked on its repositioning and created a product harmonization that provides customers with better orientation and comparability in its highly specialized portfolio. The increased visibility of the core brand epsotech and the investment in innovation and digitalization strengthen our position in the highly competitive European plastics market.

In the future, the focus will remain on digitalization, growth and innovation. **The new epsotech management team** will build on the initiatives already launched and pursue them consistently with the approach, "one company - one brand".
